Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Applicant's election with traverse of Group I in the reply filed on 8/8/05 is acknowledged. The traversal is on the ground(s) that the claims in Groups I and II require common elements and do not require an additional search. This is not found persuasive because the search is based on different classifications of Groups I and II and constitute an undue burden in that the search for Group I does not require the presence of other group to make a polymerizable liquid crystal material .

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-6, 10,11,and 14-15 are read on the elected species.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 10,11,14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Chem Abstract 135: 153178 or 130: 197214.

135: 153178 discloses preparation and properties of polythiophene with phenylacetylene substituent.

In the claimed formulae, if R1=phenyl group or substituted phenyl group, R2=hydrogen, then the claimed formulae II and Ia are read on the teachings of the reference.

In the claimed formula I, if b=d=0, and at least one and c is 1, then the claimed formula I is read on the claimed formula II and read on the teachings of the reference.

130: 197214 discloses theoretical analysis of substituent effects on building blocks of conducting polymers in that in the claimed formulae, if $R1=R2=$ hydrogen and $n=2$ then the claimed formula is read on the teachings of the reference.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.
